To A Verrall (MIN) <a.verrall@ministers.govt.nz>

Morena Minister Verrall

Please find included anonymised ESR 2005 data demonstrating how all 11 adult's resident by 1966 have been excluded from the reported

short term residents (and the only) pre vs post 1973 comparison, please note the years of residence for 1023 have been altered to 22 years

duration of residence. The 1964-69 period was identified as the primary period for airborne dioxin releases in evidence of the Health Dept

RAPCO to the 1986 Ministerial Inquiry and that all Health Dept records from this important period had apparently been destroyed by 1989.
